

Atal Sarige is aimed at providing direct connectivity at cheaper rates to areas populated by economically weaker & marginal sections.

The route notation used is AS

AVAILABILITY

How long do you have to wait for your bus?

The answer decides how frequently buses are available on your route at your timings.

ACCESSIBILITY

How much do you have to walk to access a bus stop?

The answer decides how accessible a bus stop is. 'Accessibility' is defined by the distance people have to walk to reach a bus stop.

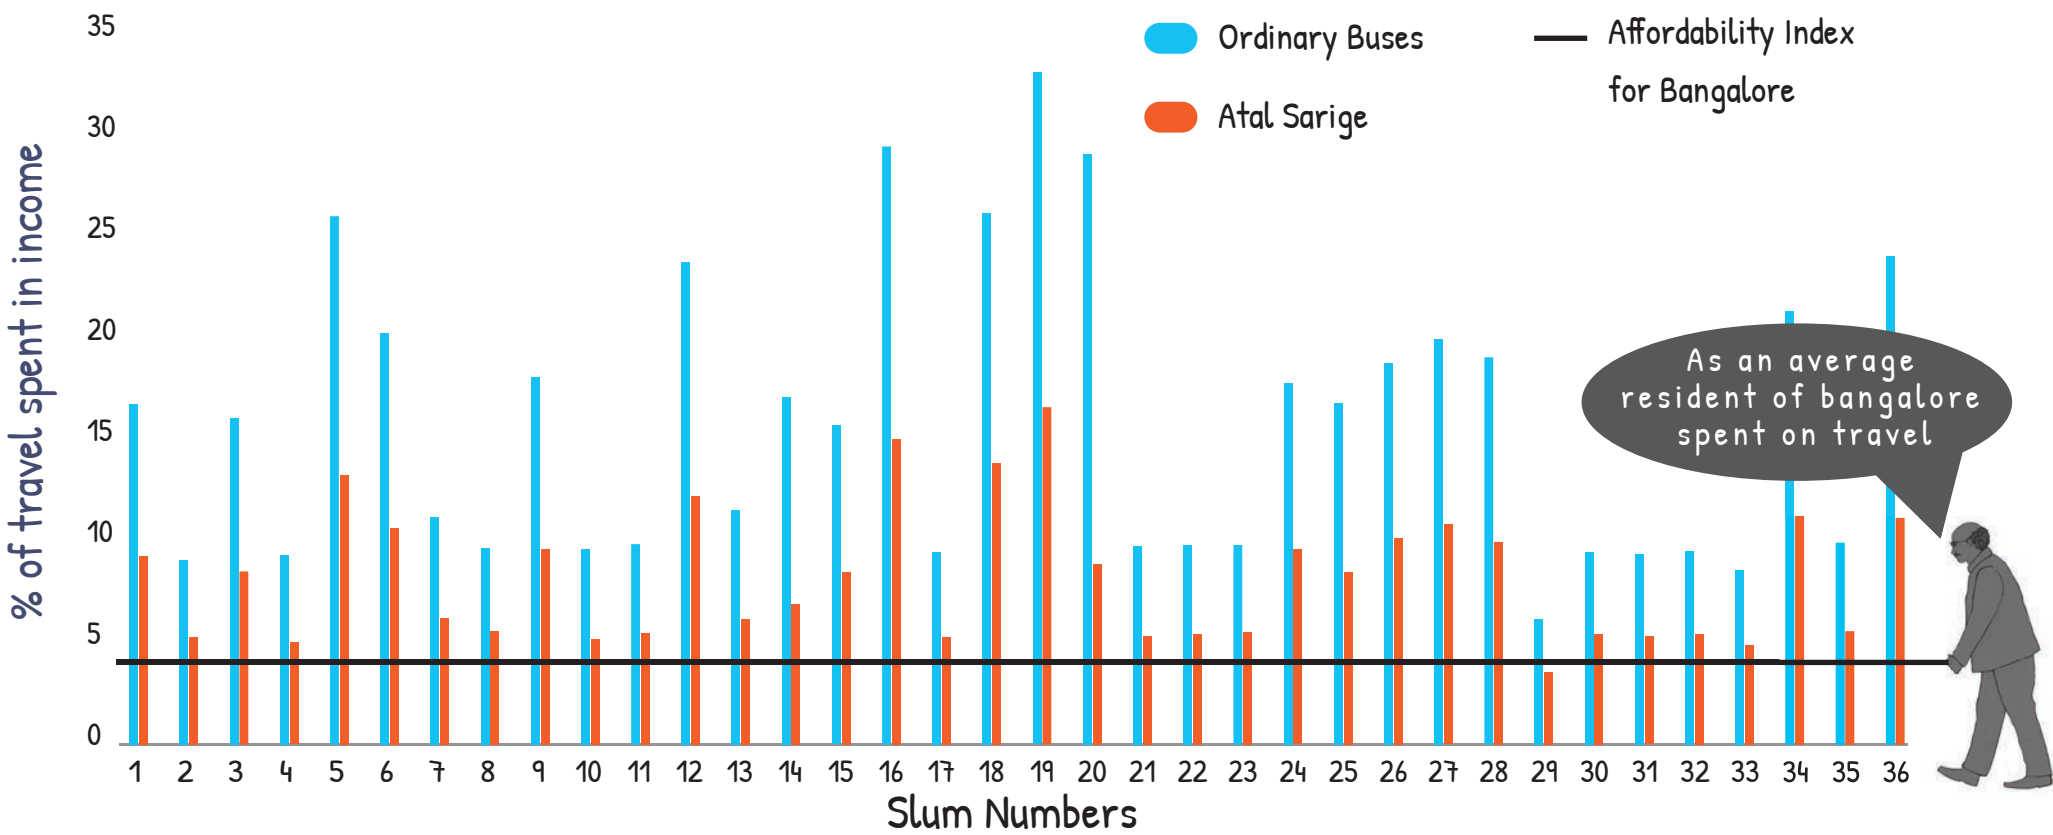

AFFORDABILITY

What part of your income goes toward travel?

The answer decides how affordable public transport is. The more you need to spend, the greater is the burden of affordability.

Transport affordability index for slums

The transport affordability index shows the portion of one's income spent on public transport. The Atal Sarige service reduces the cost burden for marginalised communities by half.
